COMPANY-IN-FORMATION • CRYPTO CARRY • TRADING INFRASTRUCTURE

A concise view of why TheDuckTrader exists.

TheDuckTrader is building toward a disciplined delta-neutral crypto trading company with a strong infrastructure bias. The current focus is not maximizing superficial trade count; it is building a stack that can explain edge quality, protect capital, and evolve intelligently as markets change.

We believe the long-term value is created by the combination of strategy logic, execution quality, accounting truth, and observability. The platform is already proving those operating habits under live testnet conditions.
